

Hi Dr. Henry Ng,

Thanks for your email.

The revised criteria related to our products would be Aflatoxins and PHO.

We have noted the proposed criteria for Aflatoxins and are taking necessary action to comply within the stipulated time.

Besides, internally, we are already in the process of gradually replacing the PHO with non-PHO in our products.

Above information are for your reference.

We have no further comment at this moment.

Thanks again for your help on consolidating the comments.

Best Regards,  
Ruby Yang
